

INDIGO User Interface

INDIGO User Interface: Intelligent 5G Networks Designed and Integrated for Globalized Operations

Riju Dey and Anya Trumbach
Advisors: John Drogo, Dr. Zussman

Agenda

1. Introduction
 - a. What is INDIGO?
 - b. An Illustrative Example
2. User Interface
 - a. System Architecture
 - b. UI Mockup
3. Implementation Details
 - a. Frontend implementation
 - b. Backend implementation
4. Conclusions and Next Steps

What is INDIGO?

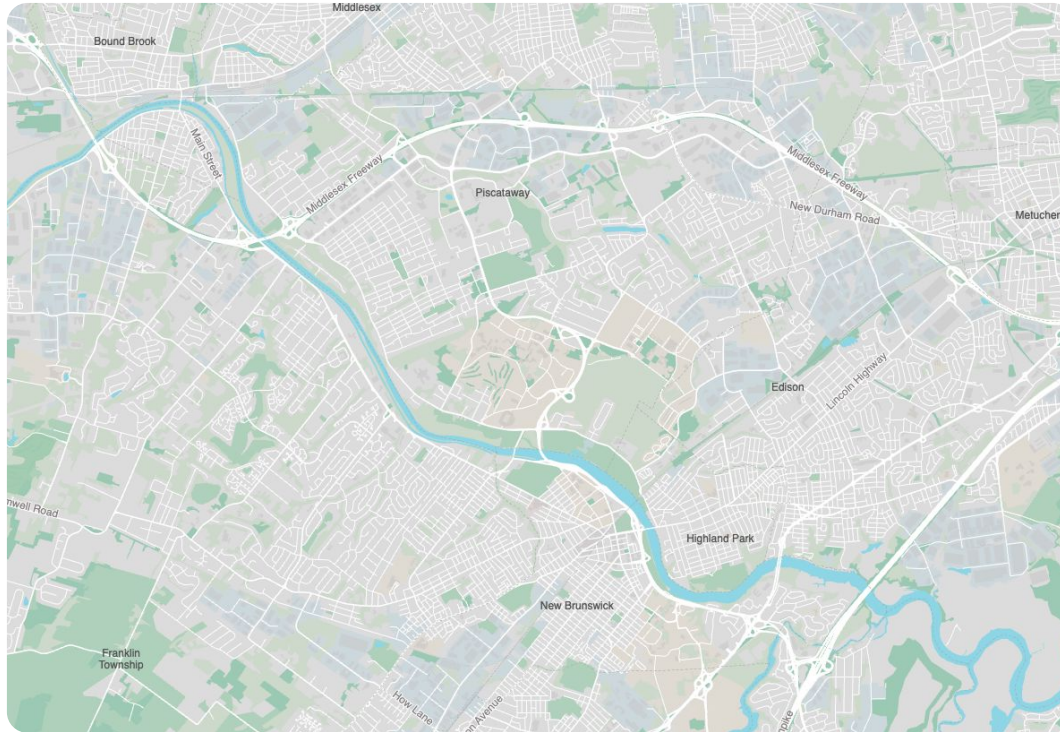

"Intelligent 5G Networks Designed and Integrated for
Globalized Operations"

What is INDIGO?

"Intelligent 5G Networks Designed and Integrated for
Globalized Operations"

Ok, but what does that mean?

Example: Natural Disaster

New Jersey

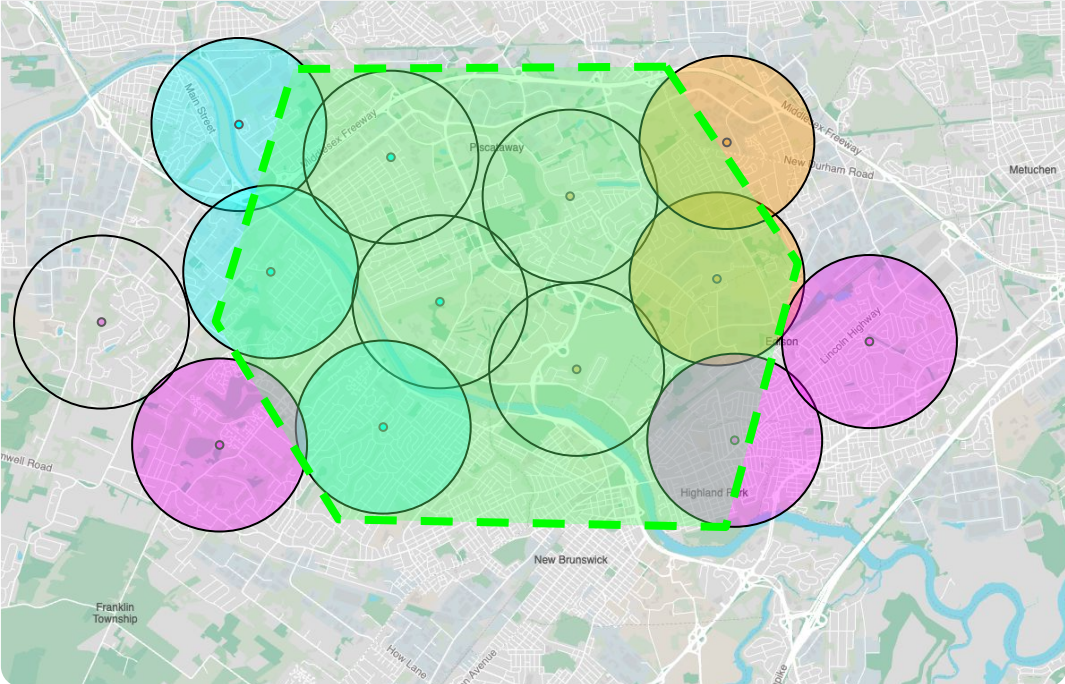

Example: Natural Disaster

The red area is not covered by any one base station

Solution: INDIGO

INDIGO Live View

Status **DEGRADED**
No Missions
3 Operators Impacted

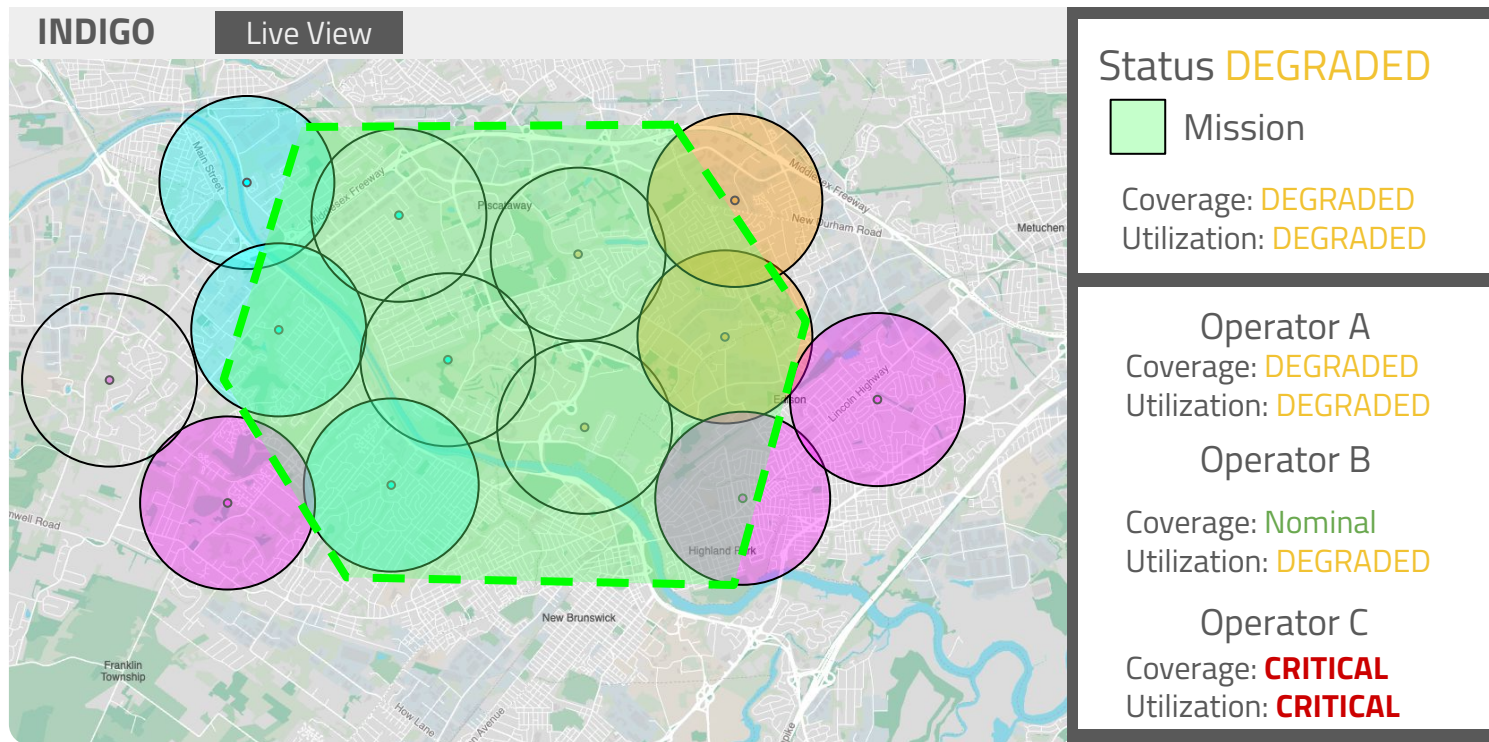

1. Draw Mission Boundary
2. Set Mission Parameters

Resiliency

Bandwidth

Submit

Solution: INDIGO

What is INDIGO?

A System to Ensure Secure & Resilient Connectivity for NATO Forces and First Responders in a Crisis

Two Critical Services

Multi Operator SMO (MO-SMO) - The INDIGO system aggregates and coordinates information across operators (think Verizon or AT&T)

Mission Planner - Application that draws information from the MO-SMO

What is INDIGO?

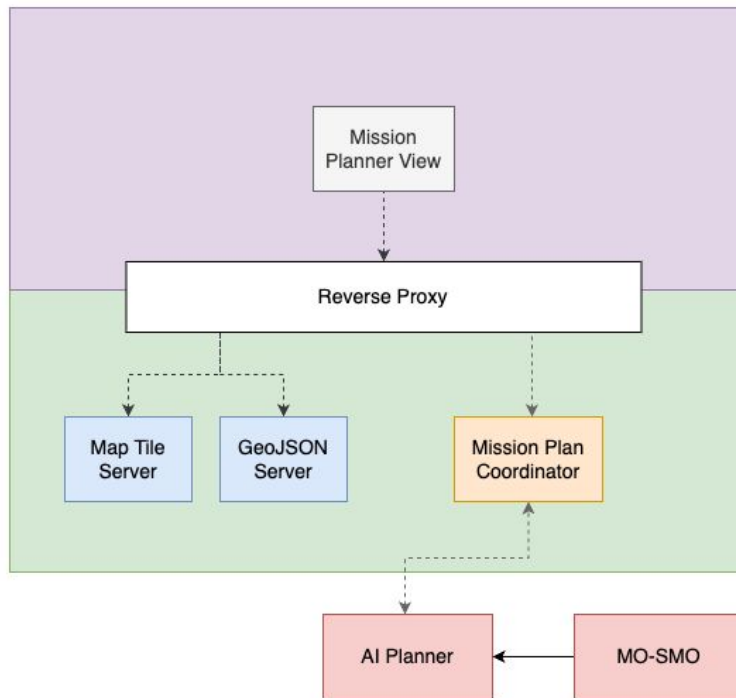

A System to Ensure Secure & Resilient Connectivity for NATO Forces and First Responders in a Crisis

Two Critical Services

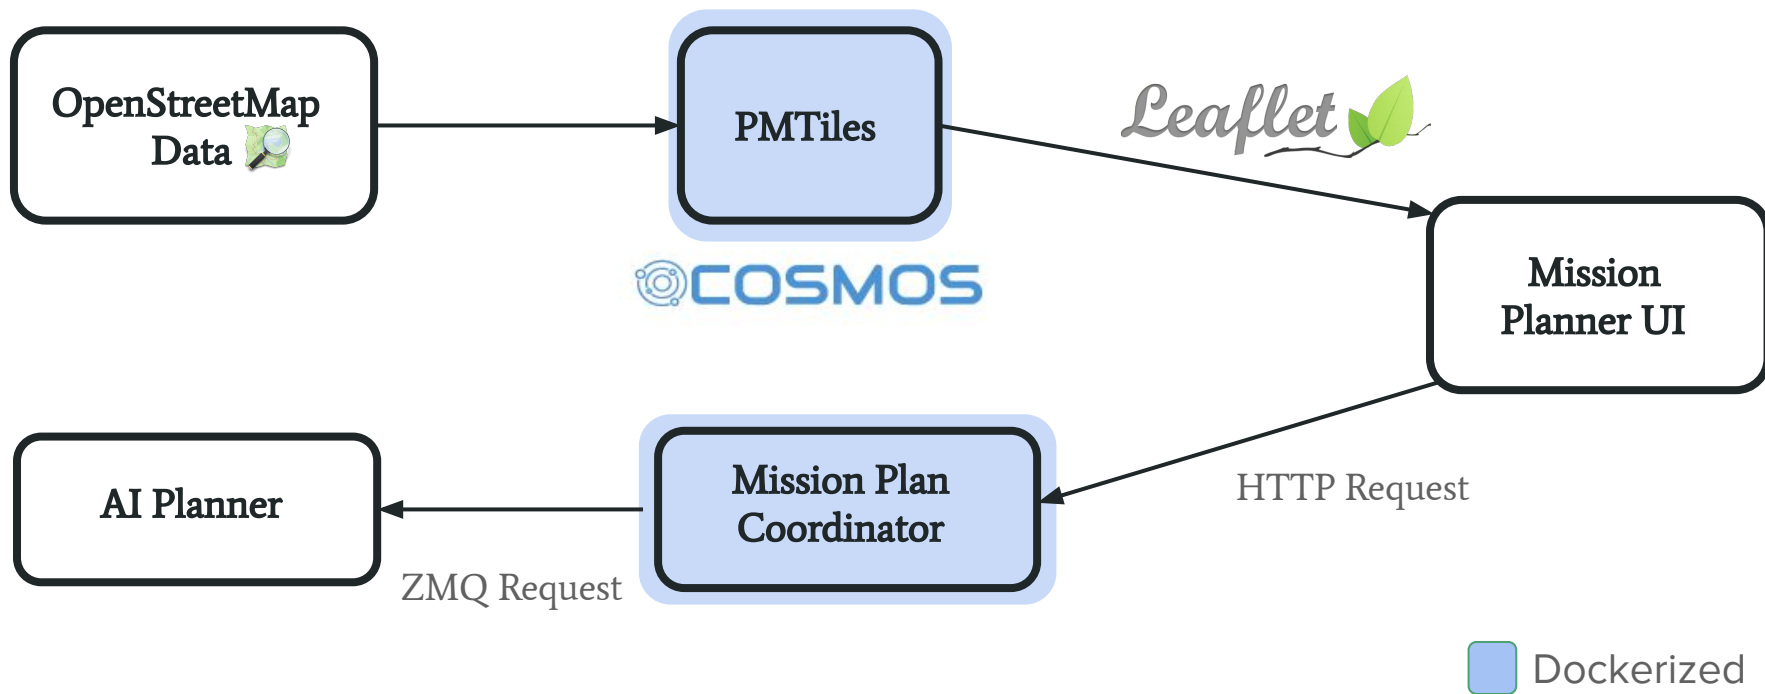

Multi Operator SMO (MO-SMO) - The INDIGO system aggregates and coordinates information across operators (think Verizon or AT&T)

Mission Planner - Application that draws information from the MO-SMO

Mission Planner UI: Architecture

Mission Planner UI: Implementation

Conclusions and Next Steps

The INDIGO project uses emerging open industry standards and increased integration to enable rapid emergency responses

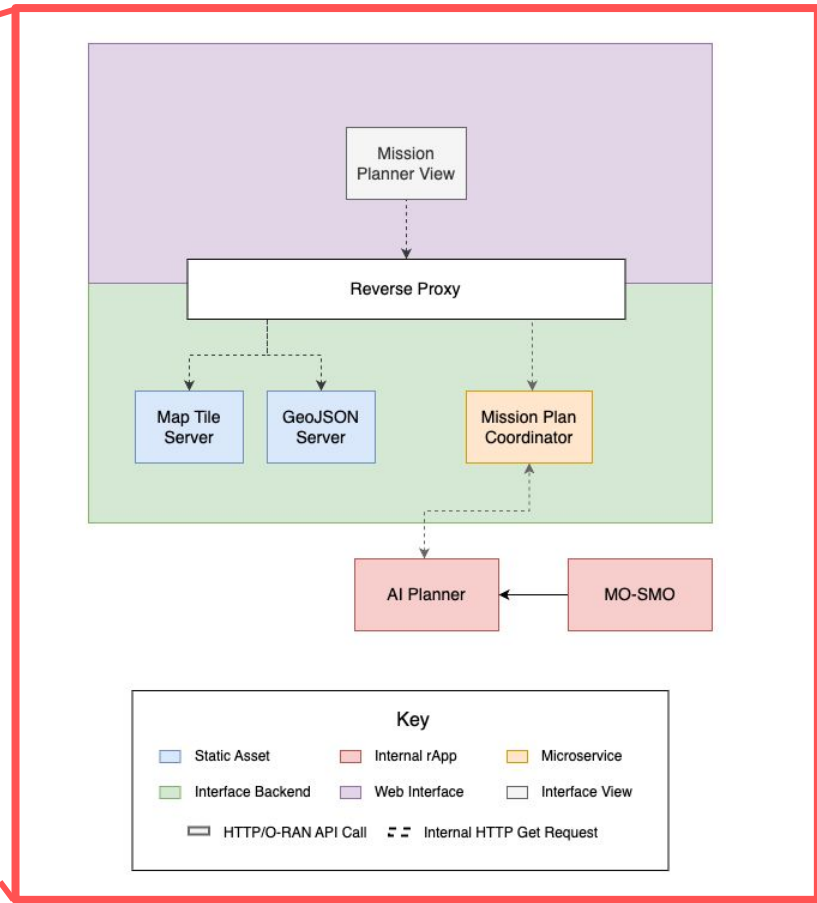

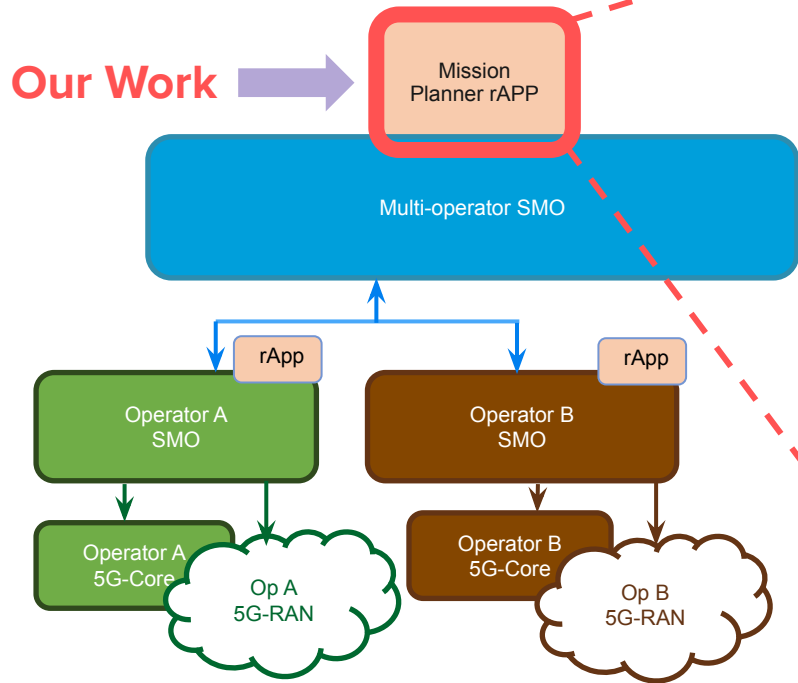

Our next steps include:

1. Bridging the connection between the UI and the AI Planner
2. Hosting servers on COSMOS testbed servers
3. Implementing an nginx reverse proxy as an unified interface

Questions?

INDIGO Architecture: Where We Fit In

Architecture

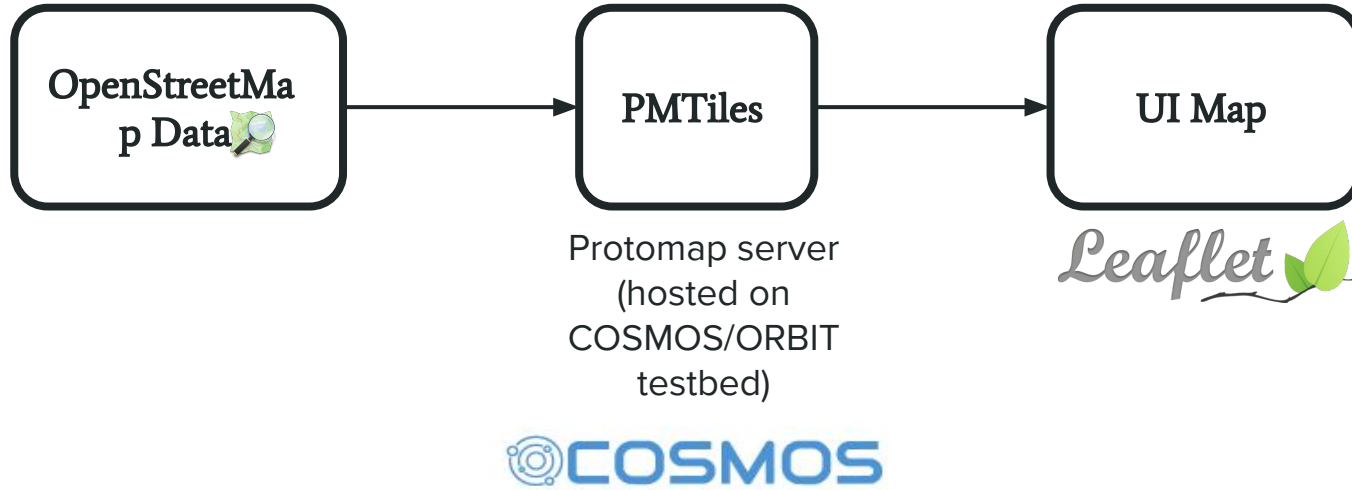

Example: Disasters

Problem:

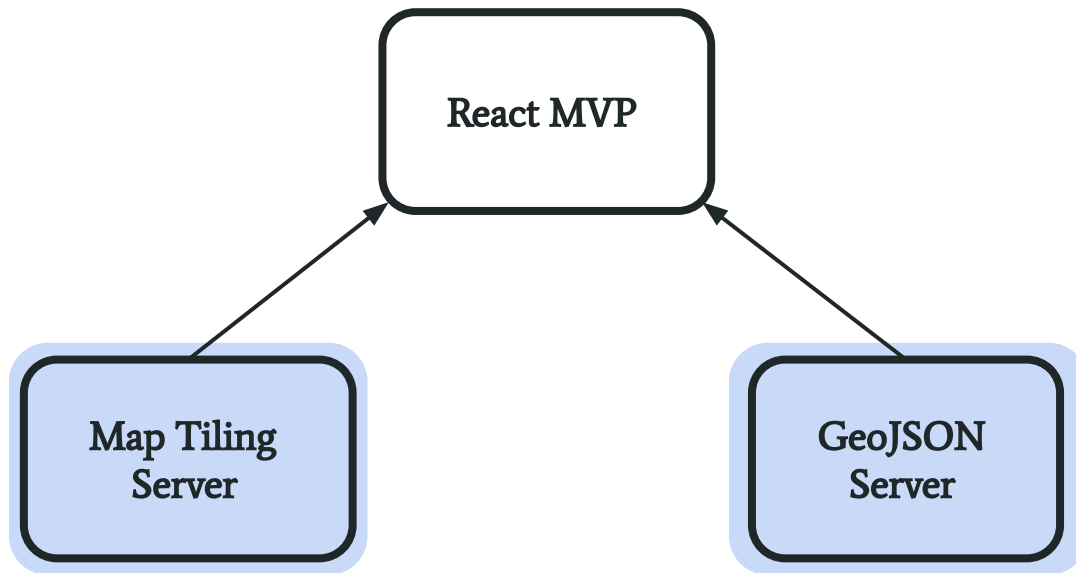

First responders cannot get the network coverage they need.

Mission Planner UI: Map Tiling Server

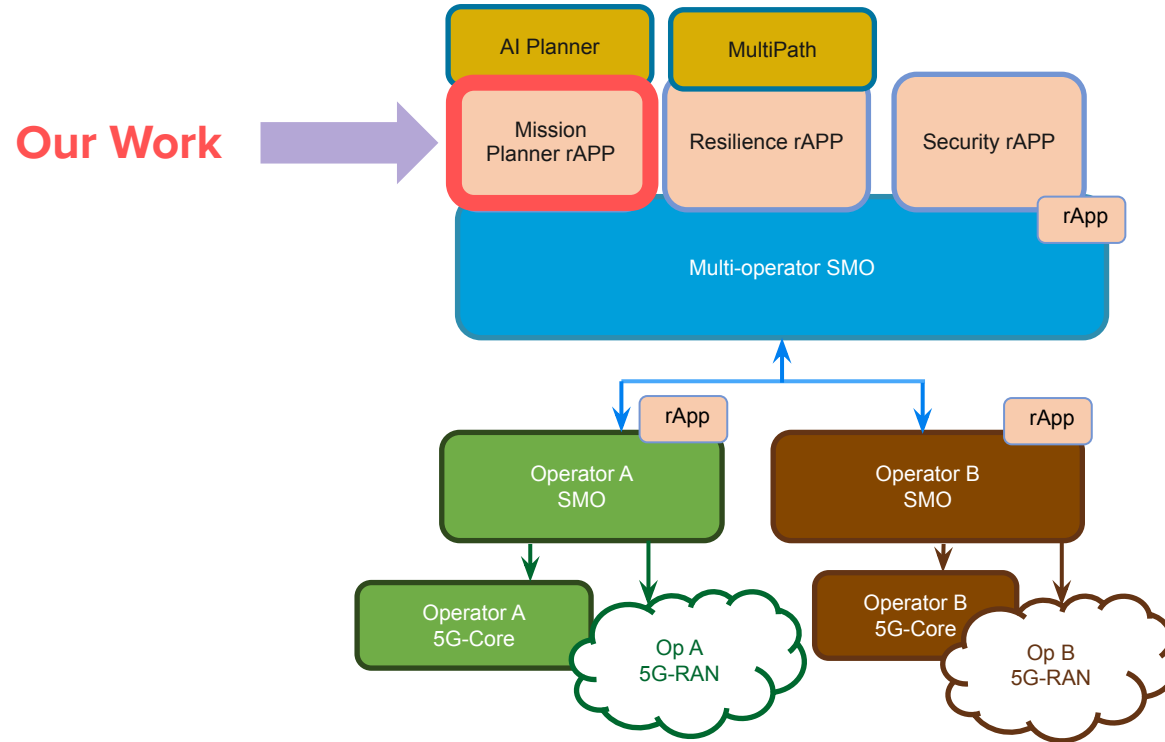

Mission Planner UI: Frontend

 Dockerized

Architecture and Where We Fit In

Mission Planner UI: Architecture
